

A Multidisciplinary Approach to Schistosomiasis Control in Northern Cameroon

With special reference to the role of fish in snail control

Roel Slootweg

**A Multidisciplinary Approach to Schistosomiasis
Control in Northern Cameroon**

With special reference to the role of fish in snail control

Proefschrift

ter verkrijging van de graad van Doctor
aan de Rijksuniversiteit te Leiden,
op gezag van de Rector Magnificus Dr. L. Leertouwer,
hoogleraar in de faculteit der Godgeleerdheid,
volgens besluit van het College van Dekanen
te verdedigen op woensdag 16 februari 1994
te klokke 14.15 uur

door

Roel Slootweg

geboren te Hazerswoude in 1958

Promotor : Prof. Dr. H.A. Ude de Haes
Co-promotor : Dr. A.M. Polderman
Referent : Dr. F. Witte
Commissieleden : Prof. Dr. K. Bakker
Dr. C.D.N. Barel
Dr. B. Gryseels
Prof. Dr. G.J. Mulder

CONTENTS

	Preface	5
1	Introduction	9
	<u>Part I: General background</u>	
2	Objectives and results of the Lagdo Fishculture Project	
	2.1 Partial restoration of floodplain functions at local level: the experience of Gounougou, Benue Valley, Cameroon	16
	<u>Part II: Descriptive research</u>	
3	Biology of snail intermediate hosts of schistosomiasis	
	3.1 A longitudinal study of snail intermediate hosts of trematode parasites in the Benue valley of North Cameroon	25
	3.2 Further observations on the distribution of <i>Bulinus senegalensis</i> Müller in Cameroon	42
4	Transmission risk through water contact	
	4.1 Water contact studies for the assessment of schistosomiasis infections risks in an irrigation scheme in Cameroon	47
5	Epidemiology of schistosomiasis	
	5.1 Population structure and schistosomiasis infection in villages on the right bank of the Benue river	61
	<u>Part III: Experimental control</u>	
6	Snail control by fish	
	6.1 Prey selection by molluscivorous cichlids foraging on snail intermediate hosts of schistosomiasis	68
	6.2 Proposed introduction of <i>Astatoreochromis alluaudi</i> , an East African mollusc crushing cichlid, as a means of snail control.....	76
	6.3 The effects of molluscivorous fish, water quality and pond management on the development of snail intermediate hosts of schistosomiasis in aquaculture ponds in North Cameroon	81
	6.4 The biological control of snail intermediate hosts of schistosomiasis by fish	88
7	Water and habitat management as a means of snail control.	
	7.1 Reducing schistosomiasis infection risks through improved drainage	109
8	Primary health care and schistosomiasis control	
	8.1 The role of existing health care facilities in controlling vesical schistosomiasis in rural Northern Cameroon	119
9	General discussion and conclusions	128
	Summary	133
	Résumé (français)	139
